

Fountain grass

Pennisetum setaceum

Fountain grass is an **invasive** plant native to NE of Africa that is used in gardening along the Mediterranean coasts of Andalusia.

Outcompetes
native species

Favors forest fires

Easily dispersed

Its control is costly to everyone

The Consejería de Medio Ambiente (Environmental Council) has launched the **Andalusian Programme to Control Invasive Alien Species** to control the harmful invasive plants and inform users about the ecological danger that it can cause.

PROGRAMA ANDALUZ

para el control
de las especies
exóticas invasoras

What can we do to avoid its expansion?

**Avoid the use of
Fountain grass,
to protect the ecosystems
and minimize costs
derived from its invasion...**

Fountain Grass

1
Incipient invasion
Plants escaping from
garden areas

2
Final result: Native species eliminated
